Python Pandas Matplotlib Streamlit Excel

### Selenium E-commerce Projects

On the first project, reported a defect from a reputed e-commerce website implementing TestNG Listener methods to validate the pop-up of Forgot Password functionality with attachments. On the later one, crafted E2E scenario based test scripting on a practice static e-commerce website login to checkout flow.

- Github(Project 2) : <https://github.com/Zama-n-oob/Selenium-TestNG-Project2>

Selenium TestNG Java

### Selenium Tutorial

Achieved hands on experience in locators, synchronization methods(i.e.Sleep, Implicit Wait, Explicit Wait), handling Static and Dynamic Dropdowns by scripting. Used assertion methods from TestNG framework to validate the results in different scenarios i.e. functionalities, UI performance etc on three different Rahul Shetty Academy practice websites.

Selenium TestNG Java

### Postman API tutorial

Worked on some open source API's to get hands on experience of fundamentals of API build and test automation.

- Github : <https://github.com/Zama-n-oob/postman-API-testing>

Postman Javascript

### Jmeter Tutorial

Performed load testing, performance testing and script recording by simulating multiple users under varying load conditions across different sites. Different listeners and record controllers were used for analysis and script management.
